    response2.write("</body>");  
    response2.write("</html>");  
    response2.end();  
  
}), 1000);
```

```
td:nth-of-type(1):before { content: "Hour"; }  
td:nth-of-type(2):before { content: "Temperature"; }
```

```
/* Hide table headers (but not display: none;, for accessibility) */  
thead tr {  
    position: absolute;  
    top: -9999px;  
    left: -9999px;  
}
```

Limitations of my Project

proper structuring of serving static and
dynamic content
iterative callbacks
DHCP
